To whom it may concern,

12/17/2018

In 2016 we worked with our flexible PVC supplier to develop a modification to our base flexible PVC compound formulation that omits the Phthalate based plasticizer, and replaced it with a bio based plasticizer. NSF has approved the base formulations changes. The final compound ID numbers used to make your gasket products, remains unchanged.

All of our Rigid PVC raw materials are Prop 65 compliant. We have supporting documents from all suppliers supporting their compliance to Prop 65.

As of 3/21/2017, all of the products that we have produced and shipped are Prop 65 compliant.
